

The Many Uses for Cinnamon in the Garden by Rosamond Connell

1. Propagate Cuttings

Use cinnamon to propagate the cuttings if you don't have access to a rooting hormone. Just wet the cutting in clean water and roll it in cinnamon powder before planting. Application of cinnamon will prevent disease and infections during the rooting process.

2. Kill Mushrooms

Tired of pulling wild mushrooms from your garden? Sprinkle cinnamon around the places where those mushrooms pop up. It will definitely keep them in check.

3. Deter Ants

If you want to get rid of ants from your garden, sprinkle cinnamon on ants tracks or where you don't want ants. They hate the smell of cinnamon and will start to avoid those places where you sprinkled it.

4. Protect Seedlings from Diseases

Several fungal and other diseases could cause your seedlings to die. Dust your soil with cinnamon powder to safeguard your seedlings from various diseases.

5. Fungicide

Plants suffering from fungal diseases? Mix some cinnamon into warm water and let it steep overnight. Strain it and pour into a spray bottle. Spray your plants with this solution.

6. Heal Plant's Wounds

Cinnamon is great for the plants suffering from wounds. Dust cinnamon on the wound to help promote fast healing.
